INDIANA SPEED TEST INITIATIVE

WHAT IS YOUR HOME INTERNET SPEED?

Join us in participating in **a crowd-sourced internet speed project**. The goal is to create an accurate map of where internet service is available and what broadband speed Indiana residents are currently receiving.

ROI REGIONAL OPPORTUNITY INITIATIVES

TAKE THE SPEED TEST:
www.regionalopportunityinc.org/speed-test/

SCAN ME

The test takes one minute to complete and we recommend you take it on a home internet-connected device.

About the Speed Test

A speed test measures the speed between your device and a server in real-time using your internet connection. It can be completed using any device that has an internet or cellular connection. You will see download, upload, and latency, and ping speeds.

You can repeat the test many times and at different times of the day. By submitting more tests, you will provide more data. More data = more insights!

Why Are We Doing This?

The goal of this project is to create an accurate region map of where internet service is available, where it is unavailable, and what broadband speed residents are receiving.

Speeds and geographic information will be used to generate mapping tools for communities that are planning broadband expansion projects or pursuing grants to support infrastructure improvements.

What If I Don't Have Internet at Home?

We still want to hear from you!

We also need to know where service is unavailable in our region. If you do not have any service at your household or workplace, you can enter that address with "NO SERVICE AVAILABLE" into the test while using a local hot spot or using a cellular device.
